 Portfolio

Profile

Skilled Software Engineer specializing in frontend development and UI/UX design. Proficient in HTML, CSS, JavaScript, and React, with a focus on creating user-centered, scalable, and responsive applications. Excels in fast-paced settings, collaborating across teams to deliver impactful software solutions. Ready to bring technical expertise and problem-solving to a growth-focused organization

Skills

React.js | Javascript | Redux | HTML5 | CSS3 | Tailwind CSS | Material UI | React-Router | Git

Projects

Cleaning Service Website

- Developed and launched a responsive cleaning service website as a **freelance project for a client**.
- Managed the entire project lifecycle, including design, development, and hosting setup.
- Built the website using **HTML, CSS, and JavaScript**, ensuring a user-friendly and mobile-optimized experience.
- Implemented a **contact form** that sends inquiry emails directly to the business owner, improving client communication.

GYM WEBSITE

- Created a gym website as a self-learning project using **React.js** and **React Router** for seamless navigation.
- **Integrated Rapid API** to enable **exercise search** functionality and **YouTube API** to display related exercise videos.
- Designed and styled the user interface with **Material-UI**, focusing on **responsive**, intuitive, and user-friendly design.

Food-Delivery

- Developed a food delivery web application using **React.js**, focusing on performance and user experience.
- Implemented **add-to-cart functionality** with **quantity management** to enhance shopping flow.
- Built a streamlined **checkout process** with a user-friendly form for easy order submission.
